Class10th Maths- chapter 7

This is problem 3 of exercise 7.3

1. Find the area of a triangle formed by joining the mid points of the sides of the triangle whose vertices are (0,-1) , (2,1) and (0,3). Find the ratio of this area to the area of the given triangle.

Solution:

Let the points be A(0,-1) , B(2,1) , C (0,3)

$$\mathbf{A} = \begin{pmatrix} 0 \\ -1 \end{pmatrix} \quad (1)$$

$$\mathbf{B} = \begin{pmatrix} 2 \\ 1 \end{pmatrix} \quad (2)$$

$$\mathbf{C} = \begin{pmatrix} 0 \\ 3 \end{pmatrix} \quad (3)$$

$$(4)$$

Let **D**,**E**,and **F** be the midpoints of **AB**, **BC** and **CA**

$$\mathbf{D} = \frac{(1)\mathbf{B} + (1)\mathbf{A}}{2} \quad (5)$$

$$\mathbf{D} = \frac{(1) \begin{pmatrix} 2 \\ 1 \end{pmatrix} + (1) \begin{pmatrix} 0 \\ -1 \end{pmatrix}}{2} \quad (6)$$

$$\mathbf{D} = \frac{\begin{pmatrix} 2 \\ 0 \end{pmatrix}}{2} \quad (7)$$

$$\mathbf{D} = \begin{pmatrix} 1 \\ 0 \end{pmatrix} \quad (8)$$

$$\mathbf{E} = \frac{(1)\mathbf{C} + (1)\mathbf{B}}{2} \quad (9)$$

$$\mathbf{E} = \frac{(1) \begin{pmatrix} 0 \\ 3 \end{pmatrix} + (1) \begin{pmatrix} 2 \\ 1 \end{pmatrix}}{2} \quad (10)$$

$$\mathbf{E} = \frac{\begin{pmatrix} 2 \\ 4 \end{pmatrix}}{2} \quad (11)$$

$$\mathbf{E} = \begin{pmatrix} 1 \\ 2 \end{pmatrix} \quad (12)$$

$$\mathbf{F} = \frac{(1)\mathbf{A} + (1)\mathbf{C}}{2} \quad (13)$$

$$\mathbf{F} = \frac{(1) \begin{pmatrix} 0 \\ -1 \end{pmatrix} + (1) \begin{pmatrix} 0 \\ 3 \end{pmatrix}}{2} \quad (14)$$

$$\mathbf{F} = \frac{\begin{pmatrix} 0 \\ 2 \end{pmatrix}}{2} \quad (15)$$

$$\mathbf{F} = \begin{pmatrix} 0 \\ 1 \end{pmatrix} \quad (16)$$

$$(17)$$

Area of triangle ABC=

$$= \frac{1}{2} \|\mathbf{AB} \times \mathbf{AC}\| \quad (18)$$

$$= \frac{1}{2} \begin{vmatrix} 2 & 0 \\ 2 & 4 \end{vmatrix} \quad (19)$$

$$= \frac{1}{2} \|8\| \quad (20)$$

$$= 4sq.units \quad (21)$$

$$(22)$$

Area of triangle DEF=

$$= \frac{1}{2} \|\mathbf{DE} \times \mathbf{DF}\| \quad (23)$$

$$= \frac{1}{2} \begin{vmatrix} 0 & -1 \\ 2 & 0 \end{vmatrix} \quad (24)$$

$$= \frac{1}{2} \|2\| \quad (25)$$

$$= 1sq.units \quad (26)$$

$$(27)$$

Therefore, the ratio between the triangle DEF and ABC = 1:4
